EDUCATION

DHARMSINH DESAI UNIVERSITY

B.Tech (IT)- **CGPA - 7.91**

07 2022 – 05 2026

Nadiad, India

HSC

Gujarat Board - **Percentage - 80%**

2020 – 2022

Junagadh, India

RELEVANT COURSEWORK

- Data Structures & Algorithms
- Database Management System (DBMS)
- Object-Oriented Programming (OOP)
- Operating Systems
- Web Development

PROJECTS

Batch Visualization | Spring Boot, Data-Jpa, Rest-Api, Prometheus, Grafana, Docker

May 2025

- Database Batch Performance Analyzer project. Developed a full-stack Spring Boot + React application with Docker, Prometheus & Grafana for detailed benchmarking and real-time visualization of database batch operations; achieved **90% throughput improvement** and **60% memory savings**, with an extensible architecture supporting alerting, scheduling, and automated optimization workflows.

Study Notion | ReactJS, ExpressJS, NodeJS, MongoDB

May 2024

- Developed an EdTech platform to facilitate seamless interaction between teachers and students for online courses. The platform allows teachers to upload **courses and materials**, and students to browse, enroll, and consume content.

Medicine Tracker | Spring Boot, Swagger UI, RestApi, React Native, Kafka

April 2024

- Developed a full-stack mobile application to help users **track medication schedules, manage inventory, and receive timely reminders**. Built the back-end for user authentication , **notification services, and management of health product inventory** and integrated it with a React Native front-end.

Issue Tracker | NextJs

June 2024

- Built an Issue Tracker application to manage and track project-related or any other issues. Users can **create, update, and assign** issues while monitoring their status in real-time.

Movie App | ReactJS, Redux Toolkit

August 2024

- Created an interactive movie platform showcasing the latest releases, categorized by genres and various filters, allowing users to **watch trailers** and discover trending movies in a responsive, user-friendly interface.

SUMMARY

Ambitious Information Technology student graduating in 2026, with hands-on experience in Java, advanced Java, MERN stack technologies, and a strong interest in backend development using Spring Boot. Skilled in problem solving with C++ and data structures and algorithms (DSA), and participated in hackathons focused on innovative, impactful software solutions.

TECHNICAL SKILLS

Languages: Advanced Java, Spring, Spring MVC, Spring Boot, C, C++, JavaScript, SQL, NoSQL

Developer tools: VS Code, Android Studio, IntelliJ IDEA Ultimate

Technologies/frameworks: GitHub, ReactJS, Redux, NextJS, NodeJS, ExpressJS, Git, Mongo, Prisma, Supabase
